

Cloud-Based File

Storage System

Internship experience, project requirements,
cloud architecture and professional learning

STUDENT	Rishav Anand
ENROLLMENT NO.	25SCS1003003052
PROGRAM & SEMESTER	B.Tech (CSE) • 3rd Semester (2nd Year)
BATCH	2CSE35
ORGANIZATION	Codec Technologies Pvt. Ltd.

INTERNSHIP PERIOD

29 July 2026

29 August 2026

CLOUD COMPUTING

Cloud Computing Intern

Presentation Roadmap

A concise structure for the internship discussion

01 Internship Overview

Role, duration and focus

02 Organization & Context

Host organization and cloud context

03 Problem & Objectives

Challenge and learning goals

04 Scope, Tools & Methodology

Technologies and working approach

05 Process Architecture

How the cloud-storage workflow operates

06 Outcomes & Learning

Skills and professional development

07 Completion Evidence

Certificate and offer letter

Internship at a Glance

Core facts documented by the internship offer and certificate

ROLE

Cloud Computing Intern

DURATION

29 July 2026 – 29 August 2026

HOST

Codec Technologies Pvt. Ltd.

CORE PROJECT REQUIREMENTS

- Use AWS S3, Azure Blob, or Google Cloud Storage.
- Implement authentication using OAuth 2.0.
- Add file versioning and sharing options.
- Design secure, organized cloud file access.

Organization Profile

Professional context in which the internship was completed

CODEC
TECHNOLOGIES

IT & BUSINESS
CONSULTANCY

Pan India • Hybrid

HOST ORGANIZATION

Codec Technologies Pvt. Ltd. is the host organization named in the internship offer.

INTERNSHIP CONTEXT

The offer identifies the role as Cloud Computing Intern and the program as a one-month internship.

PROJECT CONTEXT

- Cloud storage and object-storage concepts
- Authentication and controlled access
- File organization, versioning and sharing

Problem Statement

The cloud file-storage challenge

THE CHALLENGE

How can files be stored securely in the cloud while keeping access, versions and sharing organized?

SECURITY

Authenticated users should access only permitted files and resources.

ACCESS

Users should be able to upload, manage and access files conveniently.

VERSIONS & SHARING

Different file versions and controlled sharing should be supported.

The project is focused on designing a secure cloud-storage workflow rather than claiming a specific deployment not documented in the supplied materials.

Project Objectives

What the cloud-storage project aims to support

01 Secure Storage

Provide a secure cloud-based location for user files.

02 Authentication

Use an OAuth 2.0-based authentication approach.

03 File Access

Allow authenticated users to upload and access files.

04 Versioning

Maintain and identify different file versions.

05 Sharing

Provide controlled file-sharing options.

06 Access Control

Apply authorization and least-privilege principles.

Scope of the Project

Areas covered by the cloud-storage system

Cloud Storage

Store files using AWS S3, Azure Blob Storage, or Google Cloud Storage.

Authentication

Secure user authentication and controlled access.

File Management

Upload, access, download and manage stored files.

Versioning

Maintain multiple versions and identify the current version.

Sharing

Share files with authorized users through controlled access.

Security

Apply authentication, authorization and least-privilege principles.

Technologies, Tools & Skills

Technologies and skills required by the project brief

CLOUD OBJECT STORAGE

AWS S3 / Azure Blob / Google Cloud Storage

OAuth 2.0

Authentication and authorization flow

FILE VERSIONING

Maintain and identify file versions

SKILLS DEVELOPED

✓

✓

✓

Cloud storage concepts

Authentication & access control

File management

✓

✓

✓

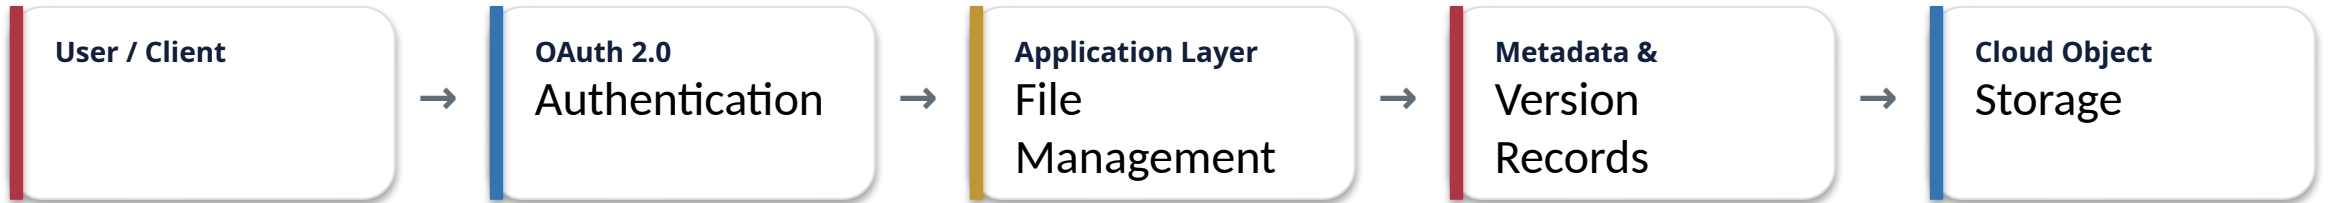

Versioning & snaring

Security awareness

System design

System / Process Architecture

Conceptual model of the cloud file-storage workflow

⬆️ ACCESS CONTROL & FILE SHARING ⬆️

The user authenticates first. The application manages file operations and metadata, while cloud object storage holds file objects. Access control and sharing determine who can access shared resources.

Methodology

Requirement analysis → design → workflow → review

01 UNDERSTAND

Project requirements and security needs

02 DESIGN

Application and cloud architecture

03 AUTHENTICATE

OAuth 2.0 access flow

04 STORE

Cloud object-storage workflow

05 MANAGE

Files, metadata and versions

06 REVIEW

Sharing, access control and testing

Expected Outcomes & Learning

Practical and professional outcomes of the internship project

EXPECTED OUTCOMES

- Secure cloud-based file-storage design
- Authenticated access workflow
- Organized cloud file management
- File versioning support
- Controlled sharing capabilities
- Understanding of cloud object storage

PROFESSIONAL GROWTH

- 01 Cloud computing concepts
- 02 Authentication & access control
- 03 System architecture
- 04 File management
- 05 Security awareness
- 06 Problem-solving
- 07 Project documentation

Internship Completion Certificate

Official completion evidence supplied by Codec Technologies

Rishav Anand • Cloud Computing Intern • 29/07/2026 – 29/08/2026

Internship Offer Letter

Official internship offer supplied for the internship

INTERNSHIP OFFER LETTER

Dear Rishav Anand ,

We are pleased to offer you a 1 Month Internship as Project Intern at Codec Technologies, a global platform dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide. Codec Technologies delivers dedicated IT and business consultancy services across 27+ countries, empowering global innovation and strategic growth.

Internship Details:

- Designation : Cloud Computing Intern
- Location & Mode: Pan India, Hybrid
- Duration : 29/07/2026 to 29/08/2026
- Reporting to : Assigned Project Head(s)

This program provides an immersive experience, enabling you to gain industry-level knowledge and acquire valuable skills. Exceptional interns may also qualify for a scholarship award based on weekly performance reviews conducted by project supervisor.

If you accept this offer and the terms above, please complete your assigned projects and training tasks on our platform and via email.

Best regards,

Sincerely,

Dr. Anurag Shrivastava,
Codec Technologies India
NCS ID: E19E86-0116588288923
Date Of Issue - 29/07/2026

Dr. Anurag Shrivastava
Talent Acquisition Manager

Cloud Computing Intern • Pan India, Hybrid • 29/07/2026 - 29/08/2026

Chandivali IT hub, Mumbai

Key Takeaways

What was gained from the cloud-computing internship project

CLOUD

Understanding of cloud object-storage concepts.

SECURITY

Authentication and controlled-access principles.

FILE MANAGEMENT

Practical model for upload, access and organization.

VERSIONING

Understanding of maintaining different file versions.

SHARING

Controlled sharing and authorization concepts.

PROFESSIONAL SKILLS

System thinking, documentation and problem-solving.

CONCLUSION

Learning

through
cloud
computing

A valuable cloud-computing experience

The internship project provided a structured understanding of secure cloud-based file storage, authentication, file management, versioning and controlled sharing. It also strengthened system-design and problem-solving skills.

ROLE

Cloud Computing Intern • Codec Technologies Pvt. Ltd.

PROJECT

Cloud-Based File Storage System
